

CANTAB Insight™

A touchscreen assessment of five cognitive domains and mood, identifying the signs of relevant cognition problems that can be caused by stress, anxiety, lifestyle, environment and medication. Employers can easily incorporate the assessment into an annual health screen.

CANTAB™ Insight is intended to be used as an adjunctive tool to assess cognitive performance and is indicated for use with individuals aged 18 to 90 years.

- FDA listed exempt and CE-Marked medical device
- 5 cognitive domains are assessed: Executive function, Processing speed, Attention, Working memory, and Episodic memory; takes 20-25 minutes to complete
- Voiceover guidance included
- Automated PDF Report and scoring reduces clinician workflow and saves time
- Easy administration and automated scoring reduces clinician workflow and saves time
- Additional depression scale included to differentiate symptoms
